

JOY SWAPNIL RAJ PARADESHI

AI Research Intern | AI Full-Stack Developer | n8n AI Agent Builder

[Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [CrisisTwin Live](#) | [CrisisTwin GitHub](#)

PROFILE

AI-focused full-stack developer and AI Research Intern building deployable AI agents, RAG workflows, automation systems, and real-world web products. Strong practical experience with React, Node.js, Express, OpenAI, n8n, Qdrant, Supabase, Google APIs, Twilio, Telegram, and geospatial systems. Recognized as GATE 2026 Qualified, NPTEL NLP Top 5%, and JNTUA Academic Topper.

EXPERIENCE

AI Research Intern - DeepDrishti.ai, Hyderabad

2026 - Present

- Built AI automation workflows and agentic prototypes using n8n, OpenAI, API tools, webhooks, Google services, and workflow orchestration.
- Designed RAG-style knowledge assistants using vector retrieval, Qdrant, OpenAI embeddings, and controlled response logic grounded in retrieved context.
- Created production-style automations across email, scheduling, daily briefing, voice-call reminders, lead qualification, support desk, and meeting intelligence use cases.

SELECTED PROJECTS

CrisisTwin AI - AI Disaster Response Digital Twin [Live Demo](#) | [GitHub](#)

- Built a full-stack disaster-response system using React/Vite, Express, OpenAI, Supabase, Leaflet/OpenStreetMap, and PDF reporting.
- Implemented geospatial context, weather-based risk scoring, AI image intelligence, emergency routing, saved missions, authentication, and role-based workflows.

n8n AI Automation Lab - 9 Agent Workflows

- Created Telegram AI Bot, RAG Knowledge Base Assistant, Auto Call Reminder, Daily AI Briefing, SmartDesk AI, Google Meet Setter, Appointment Setter, Email Assistant, and Meeting Intelligence Agent.
- Integrated OpenAI, Qdrant, Gmail, Google Sheets, Google Calendar/Meet, Telegram Bot API, Twilio, Open-Meteo, CoinGecko, GNews, SMTP, JavaScript code nodes, and n8n LangChain nodes.

Additional Live Systems: [Smart Cultivation](#) | [Municipal Complaint](#) | [Leave Management](#) | [Alumni Management](#)

TECHNICAL SKILLS

Languages:	C, Java, Python, JavaScript, PHP
Frontend:	HTML, CSS, React, Vite, responsive UI, dashboard interfaces
Backend & Data:	Node.js, Express.js, REST APIs, Supabase, PostgreSQL, PDF generation
AI & Automation:	OpenAI, n8n, AI Agents, RAG, Qdrant, prompt engineering, workflow automation
Integrations:	Google APIs, Gmail, Google Sheets, Calendar, Meet, Telegram Bot API, Twilio, SMTP
Tools:	Git, GitHub, Power BI, Excel, VS Code, Postman

ACHIEVEMENTS & EDUCATION

- GATE 2026 Qualified
- NPTEL Natural Language Processing - Top 5% - [Certificate](#)
- Academic Topper - JNTUA - [Certificate](#)
- One Week Domain Specific Workshop - [Certificate](#)
- Additional credentials available in [Portfolio](#)
- B.Tech - Computer Science & Engineering | Academic focus: AI, full-stack engineering, automation, data, and software systems.
