[CareerTwin Live](#) | [CareerTwin GitHub](#) | [CrisisTwin Live](#) | [CrisisTwin GitHub](#)

PROFILE

AI-focused full-stack developer and AI Research Intern specializing in deployable AI agents, RAG workflows, document intelligence, automation systems, and production-ready web/mobile products. Built DocuMind AI, CareerTwin AI, and CrisisTwin AI with live deployments, authentication, Supabase persistence, AI analysis, PDF exports, and Android/PWA delivery.

Career Strengths: End-to-end AI products | RAG and agentic workflows | Document/PDF intelligence | Supabase dashboards | n8n automations | Live web/mobile deployment

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, PHP, SQL	Frontend: React, Vite, HTML, CSS, responsive UI, PWA
Backend & Data: Node.js, Express.js, REST APIs, Supabase, PostgreSQL, PDF generation	AI & Automation: OpenAI, Groq AI, n8n, AI agents, RAG, Qdrant, embeddings, prompt engineering
Integrations: Google APIs, Gmail, Sheets, Calendar/Meet, Telegram Bot API, Twilio, SMTP	Tools: Git, GitHub, Postman, VS Code, Power BI, Excel, Android Studio, Capacitor

EXPERIENCE

AI Research Intern - DeepDrishti.ai, Hyderabad | 2026 - Present

- Built agentic automation prototypes using n8n, OpenAI, API tools, webhooks, Google services, and workflow orchestration for production-style business use cases.
- Designed RAG-style assistants using vector retrieval, Qdrant, OpenAI embeddings, and controlled responses grounded in retrieved context.
- Created automations for email, scheduling, daily briefings, voice-call reminders, lead qualification, support desk, and meeting intelligence.

SELECTED PROJECTS

DocuMind AI - AI Document Intelligence App | [Live Demo](#) | [GitHub](#) | [APK](#) | *React/Vite, Express, Groq AI, Supabase, PWA, Capacitor Android* | 2026

- Built a PWA and Android APK for PDF/DOCX/TXT uploads, AI summaries, document Q&A, tasks, risks, notes, saved workspaces, and PDF exports.

CareerTwin AI - AI Placement Readiness Command Center | [Live Demo](#) | [GitHub](#) | *Groq, Supabase, React, Node.js, Resume Extraction, PDF Export* | 2026

- Developed a placement platform that analyzes resumes, roles, and JDs to generate readiness scores, ATS fixes, skill gaps, coding sprints, mock interviews, and weekly roadmaps.

CrisisTwin AI - AI Disaster Response Digital Twin | [Live Demo](#) | [GitHub](#) | *React/Vite, Express, OpenAI, Supabase, Leaflet/OpenStreetMap, PDF Reports*

- Built a disaster-response command center with geospatial context, emergency routing, weather risk scoring, AI image intelligence, saved missions, role-based flows, and PDF reports.

n8n AI Automation Lab - 9 Agent Workflows | *n8n, OpenAI, Qdrant, Google APIs, Telegram, Twilio, LangChain Nodes*

- Created Telegram AI Bot, RAG Knowledge Base Assistant, Auto Call Reminder, Daily AI Briefing, SmartDesk AI, Meet Setter, Appointment Setter, Email Assistant, and Meeting Intelligence Agent.

Additional Projects: Built and deployed [Smart Cultivation](#), [Municipal Complaint System](#), [Leave Management System](#), and [Alumni Management System](#); live demos and proof available in [portfolio](#).

EDUCATION & ACHIEVEMENTS

B.Tech - Computer Science & Engineering | Academic focus: AI, full-stack engineering, automation, data, and software systems.

Achievements & Certifications: GATE 2026 Qualified | [NPTEL NLP Top 5%](#) | [JNTUA Topper](#) | [Domain Workshop](#) | 9 more certificate proofs available in [portfolio](#).
