[CrisisTwin Live](#) | [CrisisTwin GitHub](#)

PROFILE

AI-focused full-stack developer and AI Research Intern building deployable AI agents, RAG workflows, automation systems, and real-world web products. Experienced with React/Vite, Node.js, Express, Supabase/PostgreSQL, OpenAI, Groq, n8n, Qdrant, Google APIs, Twilio, Telegram, PDF reporting, and geospatial systems. Built CareerTwin AI and CrisisTwin AI as end-to-end AI products with authentication, saved workflows, AI intelligence, export-ready reports, and live demo proof.

Career Strengths: End-to-end AI product delivery | Live deployments | RAG and agentic workflows | Resume/PDF intelligence | Supabase-backed dashboards | n8n automation systems

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, PHP, SQL	Frontend: React, Vite, HTML, CSS, responsive dashboards, UI systems
Backend & Data: Node.js, Express.js, REST APIs, Supabase, PostgreSQL, PDF generation	AI & Automation: OpenAI, Groq AI APIs, n8n, AI Agents, RAG, Qdrant, embeddings, prompt engineering
Integrations: Google APIs, Gmail, Sheets, Calendar/Meet, Telegram Bot API, Twilio, SMTP	Tools: Git, GitHub, Postman, VS Code, Power BI, Excel

EXPERIENCE

AI Research Intern - DeepDrishti.ai, Hyderabad | 2026 - Present

- Built agentic automation prototypes using n8n, OpenAI, API tools, webhooks, Google services, and workflow orchestration for production-style business use cases.
- Designed RAG-style assistants using vector retrieval, Qdrant, OpenAI embeddings, and controlled response logic grounded in retrieved context.
- Created automations across email, scheduling, daily briefing, voice-call reminders, lead qualification, support desk, and meeting intelligence workflows.

SELECTED PROJECTS

DocuMind AI - AI Document Intelligence App | [Live Demo](#) | [GitHub](#) | [APK](#) | *React/Vite, Express, Groq AI, Supabase, PWA, Capacitor Android* | 2026

- Built a live PWA and Android APK for PDF/DOCX/TXT uploads, AI summaries, document Q&A, task/risk extraction, notes, saved workspaces, and PDF exports.

CareerTwin AI - AI Placement Readiness Command Center | [Live Demo](#) | [GitHub](#) | *Groq, Supabase, React, Node.js, Resume Extraction, PDF Export* | 2026

- Built an AI placement-readiness platform that turns resumes, target roles, job descriptions, skills, and weak areas into a 0-100 readiness score, ATS fixes, skill-gap matrix, coding sprint, and weekly roadmap.
- Implemented PDF/DOCX/TXT resume extraction, editable profile analysis, role-based saved plans, mentor/admin review workflows, and export-ready placement reports.
- Added mock interview generation for technical, HR, project, and scenario rounds with strong-answer signals; connected Groq AI for live analysis and Supabase for saved plans.

CrisisTwin AI - AI Disaster Response Digital Twin | [Live Demo](#) | [GitHub](#) | *React/Vite, Express, OpenAI, Supabase, Leaflet/OpenStreetMap, PDF Reports*

- Built a full-stack disaster-response command center with geospatial context, emergency routing, weather-based risk scoring, AI image intelligence, saved missions, authentication, and role-based workflows.
- Integrated OpenStreetMap/Leaflet mapping, AI mission assessment, Supabase Auth/storage, and export-ready PDF reporting for disaster-response planning.

n8n AI Automation Lab - 9 Agent Workflows | *n8n, OpenAI, Qdrant, Google APIs, Telegram, Twilio, LangChain Nodes*

- Created Telegram AI Bot, RAG Knowledge Base Assistant, Auto Call Reminder, Daily AI Briefing, SmartDesk AI, Google Meet Setter, Appointment Setter, Email Assistant, and Meeting Intelligence Agent.
- Integrated OpenAI, Qdrant, Gmail, Google Sheets, Calendar/Meet, Telegram Bot API, Twilio, Open-Meteo, CoinGecko, GNews, SMTP, JavaScript code nodes, and n8n LangChain nodes.

Additional Projects: Built and deployed [Smart Cultivation](#), [Municipal Complaint System](#), [Leave Management System](#), and [Alumni Management System](#); live demos and project proof available in portfolio.

EDUCATION & ACHIEVEMENTS

B.Tech - Computer Science & Engineering | Academic focus: AI, full-stack engineering, automation, data, and software systems.

Achievements & Certifications: GATE 2026 Qualified | [NPTEL NLP Top 5%](#) | [JNTUA Topper](#) | [Domain Workshop](#) | 9 more certificate proofs in [portfolio](#).
